

If you were waiting for a sign...

...here you go!

Consystec  [®]
Innovationen für die Werbetechnik - Schilder und mehr!

Who We Are

- We develop, produce and sell signs and orientation systems since 20 years
- High quality and attractive design made of glass and stainless steel is our hallmark
- We are large enough to offer user friendly modular systems with a wide range of sizes, stand-off dimensions and designs
- We are small enough to develop customized solutions based on our profound experience
- Our product range comprises sophisticated indoor and outdoor sign systems, advanced digital signage solutions and outstanding manufactured and designed steles and pylons

Where We Come From

- Consystec was established in 1996 as a German limited liability company
- We are a privately owned company which has been grown organically without any outside capital and which is 100% equity financed
- We are located in the highly developed Western area of Germany between Cologne and Dusseldorf with excellent connection to the transport infrastructure (road, air, sea)
- We have rather technical roots and strong experience in developing high-quality products for the demanding B2B market
- We once started with the production of sign stand-offs; over the years the product range has been extended widened through to large pylons and steles
- Today, we are a well-known and greatly appreciated market player with a distinct specializations in the development, production and sale of signs and way finding systems to a high extend made of glass and stainless steel

Exterior Signs – Wall-mounted Signs

- Large selection of glass in terms of size, thickness, type, color, number and size of drillings
- Wide range of stand-offs in terms of length, diameter, design, quality of steel and function
- Variety of screws, wall plugs, fixing & locking tools

Exterior Signs – Ground-mounted Signs and Banners

- Modular free-standing way-finding systems and advertising columns:

- Tubular frames in different diameters and measures with optional connection bars and closing caps
- Single or multiple signs in individual sizes and materials
- Different fixing options with a modular system of tube connectors, clamps and point holders

- Banner systems from 500 to 1,200 mm length with optional illumination

Exterior Signs – Steles

- Floor-mounted with stainless steel angles and up to three glass panes for one-side or bilateral lettering (indoor usage possible as well)
- From 0.4 meters in width and up to 3 meters in height possible including system static
- Under floor installation possible with galvanized steel angles

Exterior Signs – Pylons

- From 0,75 meter in width and up to 4 meter in height possible including type static certificate
- Flat or curved tempered sanitized glass
- Circular or square stainless steel tubes
- Optional side panels customized painted
- Illumination possible

What We Do (5/7)

Interior Signs – Modular Systems of classic Wall-mounted Glass Signs with Stainless Steel Stand-offs

- Wide range of glass formats, one or double pane, float or tempered glass, 2- or 4-drillings
- Large variety of stand-offs in terms of design, size and function
- Different designs of laser films with all for all kind of lettering

Interior Signs – Cassette Signs, Hanging and Flag Signs

- Stainless steel cassette signs with glass or acrylic from DIN A6 to DIN A3 size to realize cost-efficient and easy-to-change labeling solution
- Multi purpose railing system for easy and flexible installation
- Functional signs such as free/engaged displays, photo luminescent emergency exit signs, etc.
- Various flag and hanging signs with different installation options (ceiling connectors, wires, tubes)

Interior Signs – Digital Signage

- Wall mounted signs in different sizes - either with cable and color screen or battery-operated with monochrome display - in the typical “Consystec Look”
- Central controlling by LAN/W-LAN which can be seamlessly integrated into the existing network environment
- Floor standing electronic steles in different designs, sizes and features (touch, i3 PC, Android or plug and play solution, etc.)

- **Sales & Marketing:** Set up field sales, expand B2C sales activities, intensify B2B online sales, expand partner network
- **Production:** Further develop capacities for even better quality, more flexibility and logistics efficiency

Why Consystec?

- We are the developer of our products - we are no re-sellers
- We are either the producer of our products or we tightly manage the production process - we are no wholesalers
- We sell only great products - nothing less
- We know this business for 20 years - we are no beginners
- We strongly follow a consultative approach and take the time to understand our customer's needs - we are no call center
- Our staff consist of experienced experts - we are no theorists

We understand the importance of using our experience and expertise to maximize efficiency and minimize hassles for our customers
